

# Power programs simply, faster, and more equitably.

Administering programs is complex. Beam can help.

Beam simplifies program administration so that everyone—case managers, funders, and applicants—can thrive.

## What is Beam?

Beam is a platform that helps governments higher education institutions, nonprofits, and philanthropic organizations administer a wide range of programs, from rental relief and public utility benefits to emergency cash assistance, with software that streamlines applications, aids decisioning and processing, facilitates payments, and streamlines compliance, reporting, and case management into a single system. Since the COVID-19 pandemic hit in 2020, Beam has administered over \$180 million to roughly 300,000 households across the United States.

## Selected Partners

Trusted by a range of organizations around the country to effectively administer cash and benefit programs.

“

I am currently living in a domestic violence transitional home with my two children. My oldest is 1-year old and my youngest is 9 months. I have full-custody of both of my children due to the domestic violence. By receiving this emergency funding, not only will [it] help out my family and I but it will also allow me to buy the supplies I need to further my education.”

- East Los Angeles College Student
